

Our first six months

This edition looks back at iDriving's first six months, from July to December 2024. After the kick-off in Thessaloniki in July, partners started working with the pilot cities, presented the project at major European events and published the project's first reports.

PILOTS

Designing the pilots with local communities

Each iDriving pilot is being shaped together with the people who will use it. In the past months, partners held the first participatory workshops with local stakeholders:

- **Karlovac (Croatia), 1 November 2024:** first workshop for the Karlovac use case.
- **Nevers (France), 13 December 2024:** an online co-creation workshop where participants pointed out locations to monitor, risky situations between pedestrians and cyclists, and the warnings they would like to receive through mobile apps and other notifications.
- **Thessaloniki (Greece), 19 December 2024:** the second workshop for the Thessaloniki pilot discussed gaps in handling critical road situations and traffic management, user requirements and the project's performance indicators.

EVENTS

iDriving on the European stage

- **AI X Summit, Zurich, 3 October 2024:** partner Mobilysis presented iDriving at Switzerland's largest AI-focused event.
- **Smart City Expo World Congress, Barcelona, 5–7 November 2024:** Mobilysis represented the project, meeting city representatives and technology integrators.
- **Congress of Intelligent Transport Technologies (ITS Euskadi), Basque Country, 15 November 2024:** partner Ingartek presented iDriving to around 100 participants on site, from industry and public authorities, with more following online. (Source: [D7.1](#))

REPORTS

Our first public reports

Three reports (deliverables) have been completed and are publicly available:

- [D1.1](#) Comprehensive Project Management Plan, Quality Assurance and Risk Management (CERTH, September 2024)
- [D1.2](#) Data Governance and Intellectual Property Rights Handbook (Law and Internet Foundation, December 2024)
- [D7.1](#) Dissemination plan and communication materials (Acceligen, December 2024): how iDriving will share its work, with the project's logo, brochure, roll-up banner, website and social media channels
