

One year of iDriving

This edition looks back at January to June 2025, the second half of iDriving's first year. In these months we brought all partners together in Graz, asked road users and road operators what they need, presented the project at major events and started working with two sister projects.

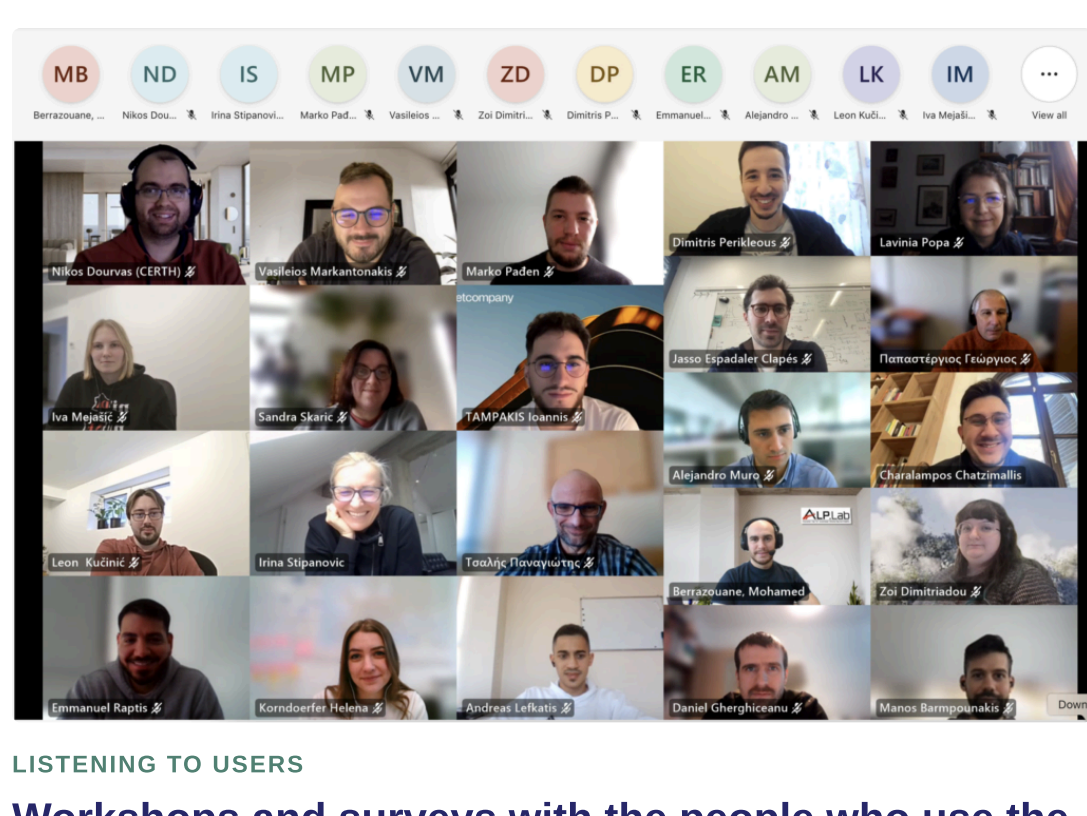

CONSORTIUM

1st Plenary Meeting in Graz

On 25 and 26 February 2025, representatives of all partners met in Graz, Austria, to review progress and plan the next steps. The meeting opened with a welcome on behalf of the mayor and a presentation by the Head of the Division of Traffic Systems of the City of Graz.

Partners discussed the project's work packages and presented the six test sites: Graz, Nevers, Karlovac, Thessaloniki, Alba Iulia and Bizkaia.

LISTENING TO USERS

Workshops and surveys with the people who use the roads

- **Karlovac, 17 January 2025:** Infra Plan and the City of Karlovac hosted the second online participatory workshop, bringing together 45 people to work on the pilot design and user requirements.
- **Bizkaia, 23 January 2025:** a workshop for the Spanish use case focused on advanced traffic management and emergency response. [Read more](#)
- **Surveys, February 2025:** we asked road users and road operators which road safety and infrastructure updates would help them most, and how they would like to receive them. [Road users](#) · [Road operators](#)

SYNERGIES

Stronger together with EvoRoads and CAMBER

On 10 June 2025, iDriving co-organised its 1st Synergy Workshop with sister Horizon Europe projects EvoRoads and CAMBER: "Implementing a holistic, data-driven safe system for all road users". The three projects compared common challenges, looked at opportunities to share data and to align their methods, so that their results are compatible and easier to scale up.

EVENTS

Presenting iDriving across Europe

- **Road Transport Research (RTR) Conference 2025, Brussels, 11–13 February:** CERTH-ITI represented the consortium. [Read more](#)
- **16th ITS European Congress, Seville, 19–21 May:** Netcompany-Intrasoft showcased iDriving at its booth, with the project video and posters. [Read more](#)
- **Horizon Europe Missions Brokerage Event, 26–27 May:** SIMAVI looked for new opportunities to sustain iDriving's results. [Read more](#)
- **Data Week 2025, 27–28 May:** SIMAVI discussed how iDriving's data architecture fits with upcoming EU standards for data sharing. [Read more](#)
- **IEEE International Conference in Electronic Engineering & Information Technology, 4–6 June:** the Technical University of Crete presented the paper "Addressing Reward Hacking in Autonomous Navigation using a Soft Actor Critic approach". [Read more](#)

CITIES

Thessaloniki shares iDriving with regional and European audiences

- **CARBONICA "Brain Gain" Conference, Thessaloniki, 3 April:** the Municipality showed how intelligent transport systems can help cut emissions and adapt cities to climate change. [Read more](#)
- **EUSAIR workshop on climate change adaptation, Corfu, 8–9 April:** iDriving was presented to policymakers from across the Adriatic-Ionian region. [Read more](#)
- **Central Macedonia resilience training, 30 April:** iDriving was used as a case study for local civil servants. [Read more](#)

REPORTS

New public reports

- [D2.2](#) User, Safety and Ethic Requirements & Pilot Use Cases Handbook (AustriaTech)
- [D2.3](#) Technical Requirements and Digital Ecosystem Architecture (Netcompany-Intrasoft)

Looking back: January to June 2025

17 Jan	2nd Karlovac use case workshop (online)
23 Jan	2nd Spain use case workshop, Bizkaia
11–13 Feb	RTR Conference 2025, Brussels
25–26 Feb	1st Plenary Meeting, Graz
3 Apr	CARBONICA Brain Gain Conference, Thessaloniki
8–9 Apr	EUSAIR workshop, Corfu
30 Apr	Central Macedonia resilience training
19–21 May	16th ITS European Congress, Seville
26–27 May	Horizon Europe Missions Brokerage Event
27–28 May	Data Week 2025
4–6 Jun	IEEE conference paper by TUC
10 Jun	1st Synergy Workshop with EvoRoads and CAMBER (online)
